SKILLS

- HTML
- CSS3
- Bootstrap
- Tailwind
- JavaScript
- ReactJs
- NodeJS
- MongoDB
- ExpressJS

PROJECTS

BookStore-App ⬈ | GitHub ○ | Node.js, Express.js, MongoDB, EJS, Tailwind-Css

- Developed a feature-rich bookstore application using **Node.js** and **EJS** for dynamic web content rendering.
- Implemented user-friendly features such as user registration, authentication, and profile management for enhanced user experience.
- Designed an intuitive shopping cart system enabling users to browse and purchase books seamlessly.
- Utilized technologies like **JWT** for secure authentication and **Nodemailer** for password reset functionalities, ensuring robust security measures..

Voting App ⬈ | GitHub ○ | ReactJs, Redux-Saga, Tailwind-Css,

- Developed a ReactJS-based voting website with distinct admin and user interfaces, leveraging **Redux-Saga** for efficient state management.
- Implemented **authentication** routes for user registration, login, and profile management to ensure secure access..
- Executed **CRUD** operations for parties, elections, votes, and party lists, enhancing the platform's functionality and usability.
- Designed and integrated a robust backend API with error code handling for status messages, facilitating data management tasks related to users, parties, elections, votes, and party lists.

ToDo-App ⬈ | GitHub ○ | Html, JavaScript, Bootstrap

- Created a dynamic To-Do List application with JavaScript, featuring task addition and removal functionality, and utilizing local storage for persistent data storage.
- Implemented user-friendly features such as input validation and responsive design for seamless task management across devices.
- Designed an intuitive user interface with Bootstrap for enhanced user experience and accessibility.
- Developed clean and modular JavaScript code, ensuring maintainability and scalability of the application over time.
